Why eat at home?

Preparing and eating meals at home is an important step toward eating healthy. Too many of us eat out in restaurants and on the go more than we should. When we eat out we usually eat more calories, fat, and sugar; fewer fruits and vegetables; fewer whole grains; and fewer low-fat dairy products.

Home-cooked food is usually lower in saturated fat, sodium, and sugar and higher in good nutrients like fiber, calcium, and iron. Why is this so? When you prepare food at home, you get to choose the ingredients.

Eating at home helps you make other healthy choices. You can include more fruits and vegetables in your main dish and side dishes and for dessert.

Meals you prepare and eat at home don't have to be fancy and don't have to take a lot of time. Preparing a simple meal at home takes about as much time as driving to a fast food restaurant or ordering a pizza.

You **CAN** have **easy**, **quick**, and **healthy** meals at home.
